# Richard Stuart Bowman

Ohio

stuartsoft2012@gmail.com github.com/stuartsoft linkedin.com/in/rsbowman

Ten (10) years of battle tested experience engineering, testing, and delivering production software. Eager to explore opportunities in AI, Open Source Software, Full Stack development. Strong advocate for Test Driven Development (TDD) and building maintainable software.

Areas of Experience:
TDD, Continuous Integration Continuous Development (CI/CD), Full Stack Development, DevOps, Containerization, LLMs, Machine Learning (ML)

Technologies I'm familiar with:
C# .NET, Typescript/Javascript (TS/JS), Linux, Git, Docker, SQL, LLMs

## Contributions and Presentations

LMBER - Language Model Basic Exchange Renderer github.com/stuartsoft/LMBER

TOXIC - Task Execution Engine github.com/stackct/toxic

*Ollama - Run langage models on your own hardware!*

Presented at Columbus Code and Coffee, May 2026 View Slide Deck

## Work History

Consultant, Callibrity, now acquired by CGI Jan 26, 2026 - Present
Location: (Remote)
Joined as a **Software Developer** title, and soon after became **Consultant**.

Software Engineer, STACK Construction Technologies Sept 4, 2018 - Nov 19, 2025
Location: (Remote) Cincinnati, Ohio

- Used Test Driven Development, CI/CD, code reviews to deliver production quality software with a high degree of confidence. Involved with DevOps during business hours, investigating alerts, observed regular deployments to production.
- Helped lead/organize internal AI user group, for guiding discussions around AI in software development and general knowledge sharing.

Mobile Engineer, Atomic Robot May 18, 2016 - Aug 31, 2018
Location: : Mason, Ohio

## Education

Grove City College, Grove City, PA Bachelor of Science in Computer Science

Relevant Coursework: Artificial Intelligence, Operating Systems, Game Development, Foundations of Comp Sci
Independent Studies: CPU Scheduling in Unix-like Environments (Fall 2015),
A* Waypoints using Genetic Algorithms (Spring 2016)
